Trainer Biography: Dan Lepinski, PSC is a leading expert in the solar energy industry. Mr. Lepinski has a unique talent for translating even the most complex aspects of solar energy into plain English, understandable by all. He has over 40 years of experience designing solar PV systems and equipment. He serves on the UL Standards Technical Panel, the Solar Industry Task Force that interfaces with the National Fire Protection Association, and the Solar America Board for Codes and Standards. Mr. Lepinski has taught a variety of audiences and consulted on a variety of subjects and client projects pertaining to Solar PV.
